

Read Me File for "Railroads and Growth in Prussia"

by Erik Hornung

This read me file describes the programs and datasets to replicate tables from Hornung, "Railroads and Growth in Prussia" published in the Journal of the European Economic Association.

This .zip file includes one Stata program and four datasets.

Please change your Stata directory to the path where you have saved the datasets found in this .zip file – 'hornung-rail-cross-section.dta', 'hornung-rail-panel-city.dta', 'hornung-rail-panel-county.dta', and 'hornung-rail-roi.dta'.

Running the do-file 'hornung-rail-tables.do' will produce all results of the paper. Comparison with the paper text makes the datasets self-explanatory.
